

SAGAR CHAVAN

Senior Technical Lead - DevOps

Pune, India | sagarchavan6210@gmail.com | [linkedin.com/in/sagarchavan](https://www.linkedin.com/in/sagarchavan) | github.com/saggy6210

PROFESSIONAL SUMMARY

Results-driven DevOps Leader with 10+ years of experience architecting enterprise-scale cloud infrastructure, CI/CD pipelines, and platform engineering solutions across AWS and Azure. Proven track record leading cross-functional teams of 5+ engineers, driving DevOps transformation initiatives, and delivering highly available systems with 99.9% uptime SLA. Expert in Infrastructure as Code (Terraform, Ansible), Kubernetes orchestration, comprehensive observability platforms (Grafana, Prometheus, Datadog), and SRE best practices. Demonstrated success in reducing deployment lead times by 60%, achieving 25% infrastructure cost optimization, and implementing enterprise disaster recovery strategies. Passionate about fostering DevOps culture, mentoring engineering teams, and operational excellence.

CORE COMPETENCIES

Cloud & Infrastructure:	AWS (EKS, EC2, Lambda, RDS, S3, VPC, IAM), Azure (AKS, VMs, App Service), Multi-Cloud Architecture
IaC & Automation:	Terraform, Ansible, CloudFormation, Python, Golang, PowerShell, Shell Scripting
CI/CD & DevOps:	GitLab CI/CD, Jenkins, Azure DevOps, Bitbucket Pipelines, GitHub Actions, ArgoCD
Containers & Orchestration:	Kubernetes, Docker, Helm, EKS, AKS, Container Security, Microservices
Observability & SRE:	Grafana, Prometheus, Alertmanager, Datadog, Elasticsearch, PagerDuty, SLO/SLI/SLA
Leadership & Practices:	Team Leadership (5+ Engineers), Agile/Scrum, DR Planning, Cost Optimization, Security Hardening

PROFESSIONAL EXPERIENCE

Senior Technical Lead - DevOps

Jul 2019 - Present

CloudHedge Technologies | Pune, India

- >> Lead a team of 5+ DevOps engineers, establishing best practices, conducting code reviews, and driving continuous improvement initiatives across enterprise product lines
- >> Architected multi-cloud infrastructure on AWS and Azure using Terraform, managing 200+ resources with zero-downtime deployments and automated disaster recovery procedures
- >> Designed and implemented enterprise CI/CD pipelines using GitLab, Jenkins, Azure DevOps, and Bitbucket, improving deployment frequency by 40% and reducing lead time by 60%
- >> Built comprehensive observability platform using Grafana, Prometheus, Alertmanager, and Datadog with Slack/Teams integrations, achieving 99.9% uptime SLA and reducing MTTR by 50%
- >> Implemented AWS Landing Zone architecture with Transit Gateway, VPC peering, IAM/OIDC, and enterprise security controls for multi-account governance
- >> Automated infrastructure operations using Golang, Python, Ansible, and PowerShell, reducing manual interventions by 80% and provisioning time from 4 hours to 30 minutes
- >> Deployed Kubernetes monitoring stack with custom alerting, Node Exporter, and FlexLM Exporter for license server monitoring across distributed systems
- >> Led disaster recovery planning and implementation including automated backups, certificate/password rotation, and infrastructure resilience testing
- >> Configured GitLab Runners on ESX servers for automated software installation, patching, and configuration management across enterprise environments
- >> Implemented cost optimization strategies through automated resource cleanup, right-sizing, and scheduled shutdown policies, achieving 25% infrastructure cost reduction
- >> Drove cloud-native migration initiatives, containerizing monolithic applications and implementing microservices architecture patterns

DevOps Engineer

Nov 2017 - Jul 2019

Siemens Industry Software (MindSphere IoT Platform) | Pune, India

- >> Engineered fully automated CI/CD pipelines with blue-green deployment strategy for Azure Web Apps, reducing deployment failures by 70%
- >> Provisioned Azure infrastructure using Terraform including AKS, VMs, App Service, Functions, Scale Sets, ACR, Redis, SQL DB, and networking components
- >> Designed centralized logging and monitoring solution using ELK Stack, Grafana, Azure Monitor, Log Analytics, and PagerDuty integration, reducing incident response time by 40%
- >> Implemented Kubernetes orchestration with Docker containerization, GitLab Runner automation, and backup/restore patterns

- procedures for production workloads
- >> Developed Shell and Python automation scripts for deployment orchestration, environment provisioning, and operational efficiency improvements
 - >> Established repository management standards, RBAC policies, and security best practices for enterprise code collaboration

Technology Integration Engineer
Amdocs Development Center | Pune, India

Jan 2016 - Nov 2017

- >> Administered WebLogic application servers including deployment automation, performance tuning, and troubleshooting for telecom billing applications serving millions of subscribers
- >> Developed server monitoring tools and automated reporting dashboards for proactive infrastructure management
- >> Created Shell scripting automation for deployment orchestration, reducing manual deployment time by 60%
- >> Provided 24x7 production support ensuring environment stability and rapid incident resolution for mission-critical systems

EDUCATION

MBA - International Business <i>PUMBA, Savitribai Phule Pune University</i>	2019 - 2021
B.Tech - Computer Science <i>Walchand College of Engineering, Sangli</i>	2012 - 2015
Diploma - Information Technology <i>Government Polytechnic, Kolhapur</i>	2009 - 2012
